

CSE341: Microprocessors

Department of Computer Science and Engineering

Assignment 05 (Lab 06)

Task 01

Take your name as input in an array. Then your program will have to capitalize all the small letters and convert all the small letters into capital letters.

Sample Input:

Enter Name: Mason Mount

Sample Output:

mASON mOUNT

Task 02

Take three inputs from the user and store it in an array then find the maximum of the three numbers

Sample Input:

Enter Three numbers: 1 2 3

Sample Output:

Largest Number: 3

Task 03

Take an array of size 5, then take input from the user to fill the array. Your program will then sort the array in ascending order. Display the final sorted array.
